Ravi Siva Ram Teja Nagulavancha

Frontend Developer

sivaram@codegnan.com 8977544082 Vijayawada, India LinkedIn GitHub

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience in building responsive and scalable web applications using HTML5, CSS3, JavaScript (ES6), Bootstrap, and React.js. Strong understanding of DOM manipulation, component-based architecture, and REST API integration. Built multiple real-world projects including a Job Portal Application and Student Management System, focusing on performance, usability, and clean UI design.

EDUCATION

Btech - College Name, 2019
Percentage: 89%

SKILLS

Languages
HTML5, CSS3, JavaScript (ES6+)

Frameworks
React.js, Bootstrap 5

Advanced
Component-Based Architecture, State Management, API Integration

Tools
Git, GitHub, VS Code

Speed Optimization
Redux Toolkit, Cross-Browser Compatibility, Debugging, Performance Optimization

LANGUAGES

- English

CERTIFICATES

Frontend Developer Trainee
- HTML, CSS, JavaScript, Bootstrap, React.js
- Project-based hands-on learning

PROJECTS

E-commerce Web Application (React + Redux) - Link
Tech Stack: React.js, Bootstrap
- Built a scalable **E-commerce** following a clean component-based architecture
- Implemented **Redux** to manage complex and asynchronous state efficiently
- Developed **search and advanced filtering features** to enhance product discovery and user experience
- Integrated **REST APIs** for dynamic product data, cart operations, and user interactions
- Improved application quality through **error handling, UI optimization, and deployment on Vercel/Render with GitHub version control**

Smart Weather & Form Validation App - Link
Tech Stack: HTML, CSS, JavaScript
- Dynamic web application using **core JavaScript concepts** including variables, data types, conditions, and loops
- Implemented **DOM manipulation and event handling** (onclick, onsubmit) for interactive user experiences
- Built **form validation using Regular Expressions**, ensuring accurate and secure user input handling
- Created a **Weather Application using Fetch API with async/await and Promises** for real-time data integration

Responsive Store UI Design - Link
Tech Stack: HTML, CSS
- Designed a modern **Store user interface using Bootstrap, HTML5, and CSS3** with a clean and professional layout
- Built a **fully responsive design using Bootstrap grid system**, ensuring compatibility across mobile, tablet, and desktop devices
- Developed key UI sections like **navigation bar, product listings, banners, and footer** with reusable components
- Enhanced user experience with **interactive elements, hover effects, and structured navigation**
- Optimized layout and performance using **Bootstrap utilities and clean CSS practices**

DECLARATION

Declaration
I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
